

VON DUPRIN®

AX exit devices

Featuring the
98/99, 94/95, 33/35A
and 22 Series devices

The exit device that requires only 5 pounds of force to operate

The AX was born out of a need to provide the market with a solution that meets the 2010 ADA Standards for Accessible Design (Chapters 404.2.7 and 309.4) that state the force required to activate operable parts shall be 5 pounds maximum. The 2013 California Building Code (Chapter 11B-309.4) adopted virtually identical requirements that went into effect January 1st, 2014, and has been carried forward into subsequent editions of the CBC.

Since pioneering the first exit device in 1908, Von Duprin life safety products have provided unparalleled quality, performance and flexibility for schools, hospitals, stadiums and public buildings. These products come with the support and customer care only offered by Von Duprin, providing the confidence and peace of mind at critical moments of life safety.

AX device code compliance

- ANSI/BHMA A156.3
- 2010 ADA Standards for Accessible Design (Chapters 404.2.7 and 309.4)
- California Building Code (Chapter 11B-309.4)]
- UL305 Panic Exit
- UL305, UL10C Fire Exit Hardware

How to identify the Von Duprin AX device

- 1** Look for the “AX” Prefix in the hardware schedule and/or specification.
- 2** In the field, look for the compliance note on the UL label and the AX device label. Both labels can be found on the center case cover of the exit device as shown below.
